PROFESSIONAL SUMMARY

Senior Visual Designer with 6+ years of experience creating high-fidelity user interfaces and visual systems for complex enterprise applications. Strong background in user-centered design, visual storytelling, and translating ambiguous requirements into polished, production-ready designs. Experienced working in consulting-style environments with cross-functional teams, stakeholders, and developers to deliver intuitive, brand-aligned digital experiences.

EXPERIENCE

Senior Analyst – UX Designer (Visual & Interaction)

Accenture, Pune

April 2022 - Present

- UX Strategy & Systems Design: Improved usability and task clarity across complex enterprise platforms as measured by reduced stakeholder rework and faster design approvals, by applying systems-level design thinking to model end-to-end user flows and interconnected workflows.
- Delivered scalable, accessible UX solutions as measured by consistent adoption across multiple modules, by translating user research insights, business goals, and technical constraints into structured wireframes, interactive prototypes, and high-fidelity UI designs in Figma.
- Strengthened design consistency and efficiency as measured by faster development handoff cycles, by contributing to design standards, reusable components, and pattern-driven UI frameworks aligned with enterprise design systems.
- User Research & Usability Testing: Validated design decisions early as measured by reduced post-development changes, by planning and conducting usability evaluations, synthesizing feedback, and iterating on designs using human-centered and inclusive design practices.
- Communicated complex design intent clearly as measured by stakeholder sign-off and implementation accuracy, by using visual storytelling, structured design presentations, and data-informed rationale in a consulting environment.
- Designed for technically complex, data-intensive environments as measured by improved information clarity and reduced cognitive load, by balancing visual polish, interaction design, and feasibility within evolving requirements.

Senior System Engineer

Infosys, Chennai

September 2019 - March 2022

- Enhanced usability of data-heavy dashboards and internal tools as measured by improved readability and workflow efficiency, by applying user-centered design principles, information architecture, and interaction design patterns.
- Improved system coherence across multiple applications as measured by reduced UI inconsistencies, by using systems thinking to align typography, spacing, and component behavior across interfaces.
- Supported UX validation efforts as measured by incremental usability improvements, by incorporating stakeholder feedback, usability observations, and iterative design refinements into production designs.
- Bridged design and engineering effectively as measured by accurate implementation, by collaborating with developers to translate design intent into technically feasible solutions..

Graphic Design Intern

Bike Street Boys, Pune

June 2018 - May 2019

- Strengthened brand storytelling and visual communication as measured by improved engagement across marketing assets, by creating infographics, layouts, and digital visuals using Adobe Creative Suite.

EDUCATION

Bachelor of Engineering (BE) Computer Engineering | Sinhgad Institute of Technology, Lonavala | June 2019

- Cumulative GPA: 8.25 | First Class with Distinction

SKILLS

High-fidelity UI design, visual hierarchy, typography, layout systems, interaction design, pixel-perfect execution, User-centered design (UCD), user flows, information architecture, Figma (Advanced), Adobe XD, Illustrator, InDesign, Agile teams, stakeholder & client presentations, design rationale communication, developer collaboration

CERTIFICATIONS

- Google UX Design Specialization – Coursera (2024)
- Visual Design: The Ultimate Guide — Interaction Design Foundation (2021)
- Become a UX Designer from Scratch — Interaction Design Foundation (2022)
